

# Robotics, Drones and Sensor Tech Innovation

October 5, 2017 8:30 am - 12:45 pm

---

8:30	<b>Coffee and registration</b>
8:55	<b>Welcome</b> Karl Koster
9:00	<b>Introductory Remarks</b> Trond Undheim
9:10	<b>Startup Lightning Talks</b> David Mindell Mike Baier Feng Tan Sampriti Bhattacharyya Rory MacKean Lael Odhner Douglas Robinow Maha Haji
9:45	<b>Networking Break</b>
10:00	<b>Industry View: Trends in Automotive Robotics</b> Alexander Zak
10:15	<b>Industry View: A call to automate the automation</b> Thomas Fuhlbrigge
10:30	<b>Academic Keynote - Robots Inspired by Animals</b> Sangbae Kim

10:45

**Panel Discussion**

Trond Undheim

- What are the killers app for robotics, drones and sensors?
- Which industries are ripe for transformation, for disruption?
- How will robots and humans work together to create the most value?
- What role will AI play in creating autonomous robots?
- What about government regulation of drones and robotics?
- What are the unexplored areas/territories when it comes to robotics, drones and sensors?
- Where might we have the biggest positive impact for the world?

Sangbae Kim

Grant Allen

Alexander Zak

Sampriti Bhattacharyya
